JOAN M. CRUZAT

Senior Full Stack Engineer | C# · .NET Core · Angular | Fintech & Payments

Obando, Bulacan, Philippines | +63 976 112 0256 | joanmcruzat@gmail.com | LinkedIn: joan-cruzat

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 9+ years of experience building secure financial and enterprise applications using C#, .NET Core, Angular, TypeScript, and MySQL. Backend-focused, with deep experience in REST APIs, microservices, payment gateway and remittance integrations, and deployment on AWS. Owns features end to end, from technical design and implementation to testing, CI/CD, and production support. Known for reliable, maintainable code, thorough code reviews, and helping other developers deliver.

TECHNICAL SKILLS

Backend: C#, .NET Core, ASP.NET Core, Web API, RESTful APIs, Microservices, System Design, EF Core

Frontend: Angular, TypeScript, JavaScript, RxJS, HTML5, SCSS

Databases: SQL Server, MySQL, Query Optimization, Performance Tuning

Cloud & DevOps: AWS, Linux, Git, CI/CD Pipelines, Deployment Automation

Testing: Playwright, End-to-End (E2E) Testing, Unit Testing, Test Automation

Security: JWT, OAuth2, Auth0, Role-Based Access Control (RBAC), Authentication & Authorization

Integrations: Payment Gateways, Remittance APIs, Payment Processing, Transaction Processing, Third-Party APIs

Other: PHP (earlier experience)

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer / .NET Engineer | Feb 2020 – May 2026

Xentra Infotech Solutions Inc.

- Designed, built, and maintained .NET Core REST APIs powering core financial workflows, including remittance, wallet top-ups, fund transfers, and reporting.
- Delivered end-to-end features across Angular and .NET for transaction workflows, dashboards, user management, settings, and reports.
- Contributed to a microservices architecture that split the application into smaller, independently deployable services.
- Integrated payment gateways, remittance providers, and third-party financial APIs, building the API communication and application logic that supported transaction processing.
- Implemented secure authentication and authorization using JWT, OAuth2, Auth0, and role-based access control (RBAC).
- Troubleshot and optimized SQL queries to improve database performance and application responsiveness.
- Analyzed execution plans, optimized joins and filtering conditions, and implemented indexing improvements to reduce query execution time.
- Built dashboards and monitoring features that gave teams visibility into transactions, reports, and application issues.
- Created a reusable Playwright E2E test framework in TypeScript covering login, authentication, and other critical workflows, and connected it to CI/CD pipelines to catch regressions earlier in the release process.
- Added application logging, error handling, and deployment scripts, and provided production support for Linux-based AWS environments.
- Conducted code reviews and mentored developers, working closely with QA, product, and UI/UX teams to troubleshoot issues and ship features.

Full Stack Developer | Sep 2016 – Jun 2021
Pinnacle Technologies Inc.

- Developed and maintained an Academic Information Management System covering enrollment, grading, scheduling, and reporting.
- Built billing, cashiering, and payment-tracking features used in day-to-day operations.
- Implemented authentication and role-based access for multiple types of users.
- Developed full-stack features using PHP, JavaScript, and MySQL, improving usability and performance.
- Reviewed and optimized database queries to resolve application performance issues.
- Partnered with stakeholders to translate requirements into working application features.

DOMAIN EXPERTISE

Fintech · Payments · Remittance · Transaction Processing · Financial API Integrations · Enterprise Applications · Microservices · Test Automation

EDUCATION

Bachelor of Science in Information Technology – Global Reciprocal Colleges **May 2015**
